

# DIY FELT SUCCULENT

*www.settleinretreat.com*

## GATHER MATERIALS

- *Felt sheets*
- *Scissors*
- *Hot glue gun & glue sticks*
- *Wooden sticks*
- *Cardboard templates*

## CUT FELT PETALS

*Using cardboard templates, cut felt petals in quantities needed for each succulent variation.*

- *See separate page for specific succulent variations.*

## CREATE PETALS

*{First step for Star, Pointy & Round Succulents only. Skip down for Leafy Succulent instructions below.}*

- 1. Put a small line of hot glue in the center of a small petal.*

## CONT. PETALS

*2. Fold the petal at an offset.  
Pinch it between your fingers to create  
some dimensional creases in the felt.*

*3. Add a couple dots of glue to the  
bottom edge and roll to create the  
center of the plant.*

*4. Repeat steps 1. & 2. for the second  
petal. Add a couple dots of glue to  
the bottom edge and attach to the  
previous piece.*

*5. Do the same with another petal.  
Continue adding pieces in a  
circular pattern.*

*Follow the petal counts in the guide for  
each size you make.*

# LEAFY SUCCULENT

1. *Start with the large-sized petals. Put a small line of hot glue in the center.*

2. *Fold the petal at an offset. Pinch it between your fingers to create some dimensional creases in the felt.*

3. *Repeat steps 1. & 2. for the second petal. Add a couple dots of glue to the bottom edge and attach to the first piece.*

4. *Attach small petals to each side, filling in around the larger petals.*

# ASSEMBLE

1. *Gather all completed succulents and wooden sticks.*

2. *Place a decent size dollop of hot glue to the bottom of the succulent and insert flat end of wooden stick in between center petals.*

3. *Add a tad more glue to base of stick to secure placement.*

- *Allow to dry before proceeding.*

4. *Insert pointed end of wooden stick into Styrofoam, already inside of vase.*

- *Place them at different heights to accommodate more and add dimension.*

> > > *ENJOY!*
